WB-3200

Finally a work bridge with fully functional texture/cure abilities. Designed for all job sites, large or small.

Compact design allows working height as low as 18" from grade height. Adaptive frame design allows for any attachments to be mounted on either side. The tethered electronic control console is mounted the same way as the operator seat, allowing a quick reverse changing feature to allow operator to be on the left or right side.

A quick selection in the control system allows for all controls to be reversed, with no electrical or hydraulic connections needing to be removed.

Standard Equipment

- 25 hp Caterpillar 1.1 Diesel
- Forward and Reverse Steering Sensors
- 4 Elevation Sensors
- Danfoss Pressure Compensated Pump
- Plus +1 Control System
- Onboard Diagnostics
- Minimum 12' Paving Width
